ROC & AUC

ROC

- 为了选出最合适的Threshold
- 横轴FPR(也是1-specificity),竖轴TPR (也叫Recall,也叫Sensitivity)的一个plot
- 能直观看到所有的possible threshold的表现(注意并不能看到某个threshold used to generate the ROC curve on the curve)

ROC & AUC 1

Important Note #1:

ROC curves are useful even if your predicted probabilities are not "properly calibrated"

AUC is a useful metric even when your classes are highly unbalanced

• 最终都要我们自己手动去决定threshold,ROC就是直观表现每种选择的影响而已。

AUC

- · Area Under the Curve
- 就是把ROC的表现量化

ROC & AUC
